

Part A

Part B

2)

$$\frac{3h}{5d} = .6h/d$$

Last week

$$\frac{2h}{4d} = .5h/d$$

This week

Last week was more productive with .6 houses painted per day

3)

a) $30/10 = 3$ Labor Productivity

b) $30/3 = 10$ Materials Productivity

c) $30/[10+3+5] = 30/18 = 1.66$ Total Productivity

4)

$$a) 60 \cdot [1 - (19/60)] = 60 \cdot .83 = 50 \text{ mowers per day}$$

$$b) 90 \cdot [1 - (1/90)] = 90 \cdot .988 = 89 \text{ mowers per day}$$

$$c) (89 - 50) / 50 = 78\% \text{ improvement}$$
