20211108 Meeting Notes

Data

Questions

- Why more than one connect call per encounter?
- What is `Age == 0`? Lots of other ages that don't make sense (160, 139, 110, many over 100)
    - *No clue. But we can cross-reference with the age band from Surveys*
- MSDRG?
    - *Medicare severity diagnosis related group*
- Is it Gender or Sex?
- Is this the end of the data?
    - *Yes*

Follow-up

Actions

- Jessica will
    - deep dive on ages 80+
    - gender vs sex
    - update data dictionary with more info
    - work on IP issues and GitHub
- Poly team will
    - Fix CMS columns in the data to reflect factor or logical
